# Connecting the temperature probe on the fireplace

Push the temperature probe into the
hole as shown on photo.
Consolidate with a piece of ALU tape.

Connecting the plastic tube for draft measurement
on the fireplace (Pascal)

Slide the connector adapter
PVC tube (10) over the entrance
on the driver. use a screwdriver
to increase slightly the diameter
of the tube to facilitate the
connection

Slide the flexible PVC
tube (9) on the connector
adaptor PVC tube (10)

Connect the flexilble PVC tube
on the fireplace like show on the photo

Connecting the motors

Remark : cable motor 2 is not used for this purpose
